In the long run that poses a political challenge: the love of individual freedom is something that the Chinese state has long tried to **quash**. Living alone does not have to mean **breaching** social **norms**—phones and the internet make it easier than ever to keep in touch with relations, after all. Even eating out can be a trial, since Chinese food culture is associated with groups of people sharing a whole range of dishes. After repeated criticism for dining alone, in 2014 Yanni Cai, a Shanghai **journalist**, wrote “Eating Alone”, a book on how singletons can adapt Chinese **cuisine** to make a single plate a meal in itself. ### Young, single and what about it?

家庭: 年轻, 单身, 又怎样?

This article looks at the sharp rise in young Chinese happy to live by themselves; the next at old people less happy to do so.

这篇文章关注愿意独自居住的中国青年数量急剧上升这一现象。下一篇文章会关注很少乐意独居的老年人。

In her tiny flat, which she shares with two cats and a flock of porcelain owls, Chi Yingying describes her parents as wanting to be the controlling shareholders in her life. Even when she was in her early 20s, her mother raged at her for being unmarried. At 28 Ms Chi took “the most courageous decision of my life” and moved into her own home. Now 33, she relishes the privacy—at a price: her monthly rent of 4,000 yuan (\$625) swallows nearly half her salary.

迟莹莹房里除了两只猫, 同时放着一堆猫头鹰的瓷玩偶, 她说她的父母干涉她的生活就好像她是她们的投资品一样。即即便当她还只是二十岁出头的黄毛丫头,

妈妈还是会因为她没结婚而数落她。28岁时，迟小姐做了“我一生人中最勇敢的决定”，搬进了她自己的房子里。现在33岁的她享受着个人空间，当然是有代价的：每月4000人民币（625美元）的房租几乎是她工资的一半。

In many countries leaving the family home well before marriage is a rite of passage. But in China choosing to live alone and unmarried as Ms Chi has done is eccentric verging on taboo. Chinese culture attaches a particularly high value to the idea that families should live together. Yet ever more people are living alone.

在许多国家，结婚前就搬离父母是一个成人仪式，没什么稀奇的。但在中国，像迟小姐这样没结婚，但选择独自居住的做法是近乎禁忌般反常的。中国文化里，和家人应该住在一起是非常珍视的一环。然而，现在有越来越多的人选择独自居住。

In the decade to 2010 the number of single-person households doubled. Today over 58m Chinese live by themselves, according to census data, a bigger number of one-person homes than in America, Britain and France combined. Solo dwellers make up 14% of all households. That is still low compared with rates found in Japan or Taiwan, but the proportion will certainly increase.

到2010年为止的十年中，单人独居人数增加了一倍。人口普查显示，中国现有超过5800万人独自居住，这比美国、英国和法国单人独居人数相加还要多。独居者数量占有所有家庭数量的14%。虽然这个比例相较日本和台湾依然偏低，但这个趋势必然会蔓延。

The pattern of Chinese living alone is somewhat different from that in the West, because tens of millions of (mainly poor) migrant workers have moved away from home to find work in more prosperous regions of China; many in this group live alone, often in shoeboxes. Yet for the most part younger Chinese living alone are from among the better-off. “Freedom and new wealth” have broken China's traditional family structures, says Jing Jun of Tsinghua University in Beijing.

中国人独居的模式和西方人某程度上有所不同。数以亿计相对贫困的外来务工人员从家乡迁徙到中国经济更发达的地区寻找工作，而他们大多也在狭窄的房子里独自居住。然而，在城市打拼的年轻人往往是经济条件较为富裕的。清华大学的景军说，“自由观念和富裕生活”已经打破中国传统的家庭结构。

The better-educated under-30-year-olds are, and the more money they have, the more likely they are to live alone. Rich parts of China have more non-widowed single dwellers: in Beijing a fifth of homes house only one person. The marriage age is rising, particularly in big cities such as Shanghai and Guangzhou, where the average man marries after 30 and the average woman at 28, older than their American counterparts. Divorce rates are also increasing, though they are still much lower than in America. More than 3.5m Chinese

couples split up each year, which adds to the number of single households.

30岁以下的人接受的教育越好，收入越高，独自居住的可能性就越大。相比之下，中国富裕地区有着更多非丧偶独居者，例如在北京，有五分之一的房子都只有一人居住。特别是像上海和广州这样的大城市，结婚平均年龄在逐渐上升。这些地方男性平均结婚年龄在30岁之后，女性则是28岁，相比美国的同龄人要晚。同时，离婚率也在上涨，尽管相比起美国依然处于很低的水平。每年有超过350万对中国夫妇分居，这也增加了独居者的人数。

For some, living alone is a transitional stage on the way to marriage, remarriage or family reunification. But for a growing number of people it may be a permanent state. In cities, many educated, urban women stay single, often as a positive choice—a sign of rising status and better employment opportunities. Rural areas, by contrast, have a skewed sex ratio in which men outnumber women, a consequence of families preferring sons and aborting female fetuses or abandoning baby girls. The consequence is millions of reluctant bachelors.

对有些人来说，独居是迈向婚姻、再婚或者是家庭团聚的过渡性阶段。但对越来越多的人来说，这可能是一种生活常态。在城市中，许多接受良好教育的都市女性保持单身，这是考虑到提升社会地位以及抓住升职机会的正面选择。相反，在农村地区，由于有些家庭偏爱男孩，如果怀的是女婴往往会选择流产或者遗弃，造成男性数量远超女性的性别比例失调。结果就是出现几百万不情不愿的单身汉。

In the past, adulthood in China used, almost without exception, to mean marriage and having children within supervised rural or urban structures. Now a growing number of Chinese live beyond prying eyes, able to pursue the social and sexual lives they choose.

在过去的中国，不论城乡，成年就意味着要在受到各种监管的城乡结构体系的“呵护”下结婚生子。现在，越来越多的中国人摆脱父母的束缚独自居住，这样它们就能够自由选择他们自己的社交和两性生活。

In the long run that poses a political challenge: the love of individual freedom is something that the Chinese state has long tried to quash. Living alone does not have to mean breaching social norms—phones and the internet make it easier than ever to keep in touch with relations, after all. Yet loosening family ties may open up space for new social networks, interest groups, even political aspirations of which the state may come to disapprove.

从长期来看，这也造成了政治上的被动，因为对个人自由的崇拜是中国政府一直以来试图压制的。独居并不意味着要打破社会习俗，毕竟电话和互联网的存在使得与亲人随时保持联系比以前便利了许多。然而家庭关系的疏离或许会给新社交网络、利益集团甚至是官方不赞同的政治导向提供栖身空间。

For now those who live alone are often subject to mockery. Unmarried females are labelled “leftover women” ; unmarried men, “bare branches” —for the family tree they will never grow. An online group called “women living alone” is stacked with complaints about being told to “get a boyfriend”.

现在，那些独居的人常常会成为旁人开涮的工具。未婚女性会被看作是“剩女”，而未婚男性则是“光棍”，因为在族谱上他们不能开枝散叶。在一个叫“独居女人”的网络团体中，时常会出现女性对“该找男友”的抱怨。

Even eating out can be a trial, since Chinese food culture is associated with groups of people sharing a whole range of dishes. After repeated criticism for dining alone, in 2014 Yanni Cai, a Shanghai journalist, wrote “Eating Alone”, a book on how singletons can adapt Chinese cuisine to make a single plate a meal in itself. According to tradition, even a frugal Chinese meal comprises “four dishes and one soup”. A single diner is likely to find that rather too much to stomach.

由于中国餐厅里几个人聚在一起多点几个菜是常态，所以对很多人来说，出去吃饭就像一场考验。因为单独吃饭被叨念多次后，上海记者蔡雅妮在2014年出版了一本叫《一人食》的书，写的是如何用单一物品做出只供一个人食用的中国菜肴。从传统意义来说，即使是节俭的中国餐都要包含“四菜一汤”。若这些给一个人食用的话，可能他胃吃不消。
